

Quiz 05

Instructions: Answer the questions with precise definitions. Your definitions should either be stated exactly as in the lecture or textbook, or be clearly equivalent to them. Having the “right idea” but not a precise formulation will not receive credit.

Problem 1. Let $X \sim \text{Bin}(n, p)$ be a binomially distributed random variable. What is the pdf of X ?

Problem 2. Let X be a discrete random variable. What is the **expectation** of X ?
